Professional Competence with a Caring Attitude

An easy to follow self-learning package that will result in all your staff having the **ability to demonstrate** a basic understanding of the critically important area of Fire Safety Procedures

Fire is a constant potential threat to all aged care facilities and the ability for all staff to be trained to respond effectively is critical. We really cannot spend too much time and effort in ensuring that all staff know what to do.

Both through regulatory compliance and Accreditation requirements staff must know their responsibilities in preventing emergencies and their roles if an emergency does occur.

Sound staff knowledge coupled with an effective emergency procedures program will ensure compliance with standards and efficient staff response to emergency situations.

This exciting package covers the following main areas of Fire Safety Procedures:

- Fire causes
- Fire prevention
- Fire equipment
- Staff roles if they discover a fire
- Staff roles if the fire alarm activates

This Self Learning Package contains:

A 16 minute video/DVD

A printed companion manual containing a series of questions that staff are able to answer

An electronic of the manual

All for only **\$84.95 VHS** or **\$88.95 DVD** including GST, and postage. You will not find a more economical way of providing all of your staff with this vital training.

If you have previously purchased this package in the VHS format and would like to move to DVD you can do so for the special **upgrade** price of **\$31.95**. The upgrade includes a DVD of the video which also contains an electronic copy of the manual.

This self learning package covers areas that could be linked to the following Expected Outcomes as defined in the *Aged Care Principles of the Aged Care Act 1997*

4.1 Continuous Improvement

Expected Outcome

The organisation actively pursues continuous improvement.

4.2 Regulatory Compliance

Expected Outcome

The organisation's management has systems in place to identify and ensure compliance with all relevant legislation, regulatory requirements, professional standards and guidelines, about physical environment and safety of systems.

4.3 Education and Staff Development

Expected Outcome

Management and staff have appropriate knowledge and skills to perform their roles effectively.

4.4 Living Environment

Expected Outcome

Management of the residential care service is actively working to provide a safe and comfortable environment consistent with resident care needs.

4.5 Occupational Health and Safety

Expected Outcome

Management is actively working to provide a safe working environment that meets regulatory requirements

4.6 Fire, security and other emergencies

Expected Outcome

Management and staff are actively working to provide an environment and safe systems of work that minimise fire, security and emergency risks.

A little about the presenter: **Rolly May**

Rolly May is a Health Care Safety Consultant with 25 years experience in health care emergency procedures. He holds a Graduate Diploma in Occupational Health and Safety Management.

For the past two decades Rolly has provided training and education through his consultancy business (Hospital Safety Services). He currently provides training and emergency procedures documentation to approximately 70 health care facilities in South Australia.
